EQUIFORCE

EquiForce empowers investment management firms with purpose-built technology - delivering precision-engineered solutions for performance measurement, GIPS® composite management, and AI-powered investment reporting. More than a software provider, we are a strategic partner and consultants with over 150 year of investment operations expertise - integrating AI technologies that enable our clients to operate with accuracy, confidence and a competitive edge.

OUR FIRM SOLUTIONS — Comprehensive technology and advisory built for the full investment lifecycle

Performance and Attribution

Comprehensive multi-asset performance measurement and attribution across unlimited classification hierarchies. Analyze IBOR, ABOR and PBOR performance, contribution, and attribution through flexible reporting and AI-powered insights.

GIPS® Composite Management

A powerful rules-based composite engine that streamlines composite performance management, security-level contribution and attribution, analytics and GIPS® compliance. Includes verifier-ready reporting, policy and procedure management and automated prospect distribution tracking.

Consulting Services

Empowering institutional asset managers, wealth managers, hedge funds and private market investment firms with institutional-grade performance, attribution, GIPS® composite management and operational expertise.

AI-Powered Investment Reporting

Intelligent investment reporting that surfaces accurate insights across every layer of the reporting process.

OUR DIFFERENTIATORS — What sets EquiForce apart from conventional software vendors

Consultants, Not Just Vendors

Technology alone does not solve operational challenges. Our team combines decades of hands-on investment operations and performance expertise with practical implementation experience to help clients achieve measurable results.

Purpose-Built Technology

Built by practitioners for practitioners, EquiForce is engineered to support the complexities of institutional investment operations, from data reconciliation through performance, attribution, composites and reporting.

AI at the Core

Native AI capabilities automate repetitive processes, enhance reporting efficiency and uncover insights that empower better investment decision-making.

PERFORMANCE & ATTRIBUTION

- Time-Weighted (TWRR) and Money-Weighted (IRR) returns at the security, portfolio and multi-level classification levels
- Unlimited user-defined classifications for flexible performance analysis
- Performance contribution and attribution versus benchmarks, model portfolios or composites
- AI-powered insights and audit trail to validate performance calculations
- Support for multiple exchange rate, pricing sources and valuation methodologies
- Interactive dashboards and institution-grade reporting
- AI-powered chat assistant for instant performance and attribution analysis

GIPS® COMPOSITE MANAGEMENT

- Fully integrated performance measurement and rules-based composite management platform
- Available as a stand-alone rules-based composite management solution
- AI-powered GIPS® verification readiness and validation support
- Centralized policy and procedure management
- Automated prospect tracking and distribution monitoring
- Streamlined composite construction, maintenance and compliance oversight

CONSULTING SERVICES

Empowering institutional asset managers, wealth managers, hedge funds and private market investment firms with institutional-grade performance, attribution, GIPS® composite management and operational expertise.

SERVICE OFFERINGS

- **Performance Measurement Reviews**

  Evaluate calculation methodologies, workflows, policies and reporting to identify gaps and strengthen operational best practices across performance and attribution.

- **GIPS® Composite Management & Verification Readiness Reviews**

  Establish, review, and maintain composite date, controls and procedures that support GIPS compliance. Assess workflow gaps, enhance processes and prepare firms for initial or ongoing independent verification by identifying issues before the verifier arrives.

- **Outsourced Performance Support**

  Provide experienced performance professionals to supplement internal teams - on a temporary or ongoing basis - to ensure continuity, expertise and operational efficiency.

- **Custom Client Reporting & FactSheet Development**

  Creates fully customized FactSheets, ScoreCards, and reporting packages aligned with your firm's investment philosophy, data structures and stakeholder needs. Solutions include automated workflows, dynamic visualizations, and scalable templates that elevate client communication and reduce operational burden.
